Asunto: Re: Launching the seed ecological spectrum of alpine plants [SEC=OFFICIAL]
Datos adjuntos: VENN Alpine shrubs TPG germination results.xlsx; ATT00001.htm; logo-gmba-2016-blau210pixel.png; ATT00002.htm; Deakin logo 2019.png; ATT00003.htm

Dear Eduardo,

I remembered some more (recent) alpine germination data: These are alpine shrub germination data which is from a study using a temperature gradient plate: which can simultaneously test several germination temperatures at the same time.

Again, see the comment associated with the A1 cell for more information about the seed accessions / species. I do hope to publish this data soon as well... but its fine to include in this database for now.

Thanks again, and please get in touch if you have questions about this dataset

Cheers,
Susanna
